DETAILED ACTION

The Examiner acknowledges receipt of Applicant's response to the restriction requirement filed on 04/10/2008. Applicants elected with traverse Group I, claim(s) 1-7, drawn to a composition comprising formula I. Applicant traversed on the grounds that the Groups are related and a thorough and complete search for one group would include prior art for several groups. The Examiner respectfully disagrees with this viewpoint. The Examiner respectfully points out that the Applicant specified the compounds by different formulas, therefore they are not considered to encompass similar compounds. Furthermore, the compounds require different search queries due to their various structures. For these reasons, the restriction is deemed proper and hereby made **final**.

Claims 1-16 are pending. Claim 1-7 are presented for examination on the merits as they read upon the elected subject matter. Claims 8-16 are withdrawn from consideration as being drawn to non-elected subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gibson (US 5,770,599).

Gibson discloses quinazoline derivatives of Formula I and pharmaceutical compositions containing them (abstract). The formula is disclosed as inhibitors of EGF (epidermal growth factor) receptors (column 3, lines 11-16 and 25-53). The formula can exist in solvated as well as hydrated forms (column 4, lines 25-29). The recitation "for psychosis" is an intended use recitation that does not impart a structural limitation and therefore it is not given patentable weight.
